Product price:

**PLN9.32 tax
included**

Product codes:

Reference: 120-49

EAN13: 5908268777144

UPC: -

Product features:

Product short description:

Product description:

The modular flush-mounted socket is designed for the installation of two keystone modules . It has been designed so that module replacement is easy and hassle-free. This solution allows you to quickly modernize the network without having to replace the entire socket - just change the module.

Keystone modules are installed at an angle of 45° , which allows the patch cords to be run right next to the wall, while maintaining high aesthetics. An integrated, hinged cover with a self-closing mechanism protects the RJ-45 socket against dust and dirt.

Flush-mounted sockets are adapted to work with 80x80 boxes, enabling quick surface-mounting.

Product features:

- possibility of installing 2 keystone modules
- module assembly at an angle of 45°
- flush mounting
- dust flap
- White color
- included: mounting screws, descriptive label
